

Nate Cox | Data Analyst

ncox0906@gmail.com | 707-338-5749 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Data analyst who enjoys solving problems for companies that seek continuous improvement and growth. Through thoughtful analysis, I embrace challenges that help clients make informed data-driven decisions.

SKILLS

Languages: Python, SQL, Git, Markdown, JSON, Javascript, Angular, HTML, CSS

Libraries: Pandas, NumPy, Scikit-learn (sklearn), Tensorflow, Keras, BeautifulSoup

Machine Learning: Linear Regression, Decision Trees, Neural Networks, Natural Language Processing (NLP), Unsupervised Learning

Data Visualization: Tableau, Matplotlib, Seaborn, Plotly, StreamLit

Other: AWS, PySpark, Google Colab, REST API, Scrum, Agile, GitHub, Excel, Word, Powerpoint

RELEVANT EXPERIENCE

Data Science Immersive - General Assembly

12/2021 - 03/2022

Completed 25 labs and 6 projects in a 480-hour, full-time professional training to develop and apply skills to solve real-world business problems.

- Analyzed a business's sales data to identify areas where more profits could be generated by using RFM, K-Means clustering, and a XGBoost Regressor. Presented my findings to the owners and delivered an Excel Workbook with my recommendations as well as a Tableau Dashboard. A conservative sample of my recommendations would generate a 2.2% increase in profits.
- Worked with a team of data scientists to identify shelter dogs that were at risk of high adoption wait times. Created a Streamlit app that pulled dogs from the Petfinder API and identified those at risk to give them more exposure to help get adopted.
- Collected data using the Pushshift API and used NLP techniques, such as a TF-IDF Vectorizer. I combined Multinomial Naive Bayes and Logistic Regression models using a voting ensemble that performed 17.6 percentage points higher than the baseline at determining what subreddit a comment came from.

Data Analyst - Dale Cox Distributing

02/2021 - Present

- Translate the business problem into a task to perform data analysis
- Acquire the necessary data from databases and provide Quality Assurance of the data
- Use Python and Pandas to clean the data if necessary
- Analysis on data pertaining to product sales and sale totals per store and territory
- Create reusable programs to easily generate reports
- Create data visualizations using Tableau, Seaborn, and Matplotlib
- Present or report the information and my findings to the business owners

EDUCATION

General Assembly - Data Science Immersive

12/2021 - 03/2022

Scrum Alliance - Certified ScrumMaster (CSM)

11/2021 - 11/2021

Udemy - The Complete SQL Bootcamp 2021: Go From Zero to Hero

11/2021 - 11/2021

Udemy - Complete Python Bootcamp From Zero to Hero in Python

10/2021 - 10/2021

University of California, Santa Cruz - Computer Science

09/2012 - 09/2014
